

Usage

YOJE YJ7607 Optic socket is installed on the side of the tanker to transfer the electrostatic signal and overflow signal between the tanker and loading platform. When do the bottom loading, it should be monitored on the ground. Load monitor requires a special signal to provide ground verification signal. In addition, the wire should be connected with grounding wire of vehicle identification system.

Material

Body: Aluminum
Seal: NBR
Hardware Parts: Stainless steel
Pin: 6.10

Feature

- ◆ Pre-wired detection cancels wiring and testing work time.
- ◆ Hard case, stainless steel bolts and J-type socket makes more durable.
- ◆ Lightweight, durable cover, a raised, easy to grab.
- ◆ There are three ½ inch wire holes.
- ◆ Used for many sections tankers, separate loading and unloading for different fuel.
